THIS IS OUR LAKE . . . we have to protect our investment and all that it means to our way of life here at Lindy's.

Our lake can die if we allow it. Faulty or inadequate septic systems, coupled with the rocky nature of our terrain and poor soil percolation are the leading causes of pollution. Faulty septic systems also present a health hazard not to mention offensive odors.

There are a number of things you can do to keep your system in good working order.

These include:

1. Spread out clothes washing chores over the week rather than overloading the system with a week's wash done in one day.
2. Keep your system free of: hair, string, paper towels, cigarette butts, rags and other foreign matter.
3. Never empty cooking oil, fats or coffee grounds down the drain.
4. Never use colored toilet paper—most don't disintegrate.
5. Use your dishwasher wisely—use when full. Use powders with the lowest phosphate content.

Even though it appears to be working properly, have your septic system pumped out about every three to five years. The cost for this periodic cleansing is cheap insurance against major repairs which could run well over a thousand dollars.

In addition to maintaining a properly working septic system it is important that all residents are aware and take responsibility in following precautions to keep our lake and community healthy and attractive.

These are:

1. Don't fertilize before an expected heavy rain as the runoff will be carried to the lake.
2. Don't allow grass cuttings to go into the lake.
3. Don't litter in and around the lake.
4. Don't allow dogs to run loose—this is a township ordinance. The dogs strew garbage and residents don't enjoy cleaning up the animals' messes from their property.

Lindy's Lake is a unique community. We must all work together to keep it beautiful and healthy for swimming and recreation for many years of enjoyment.
